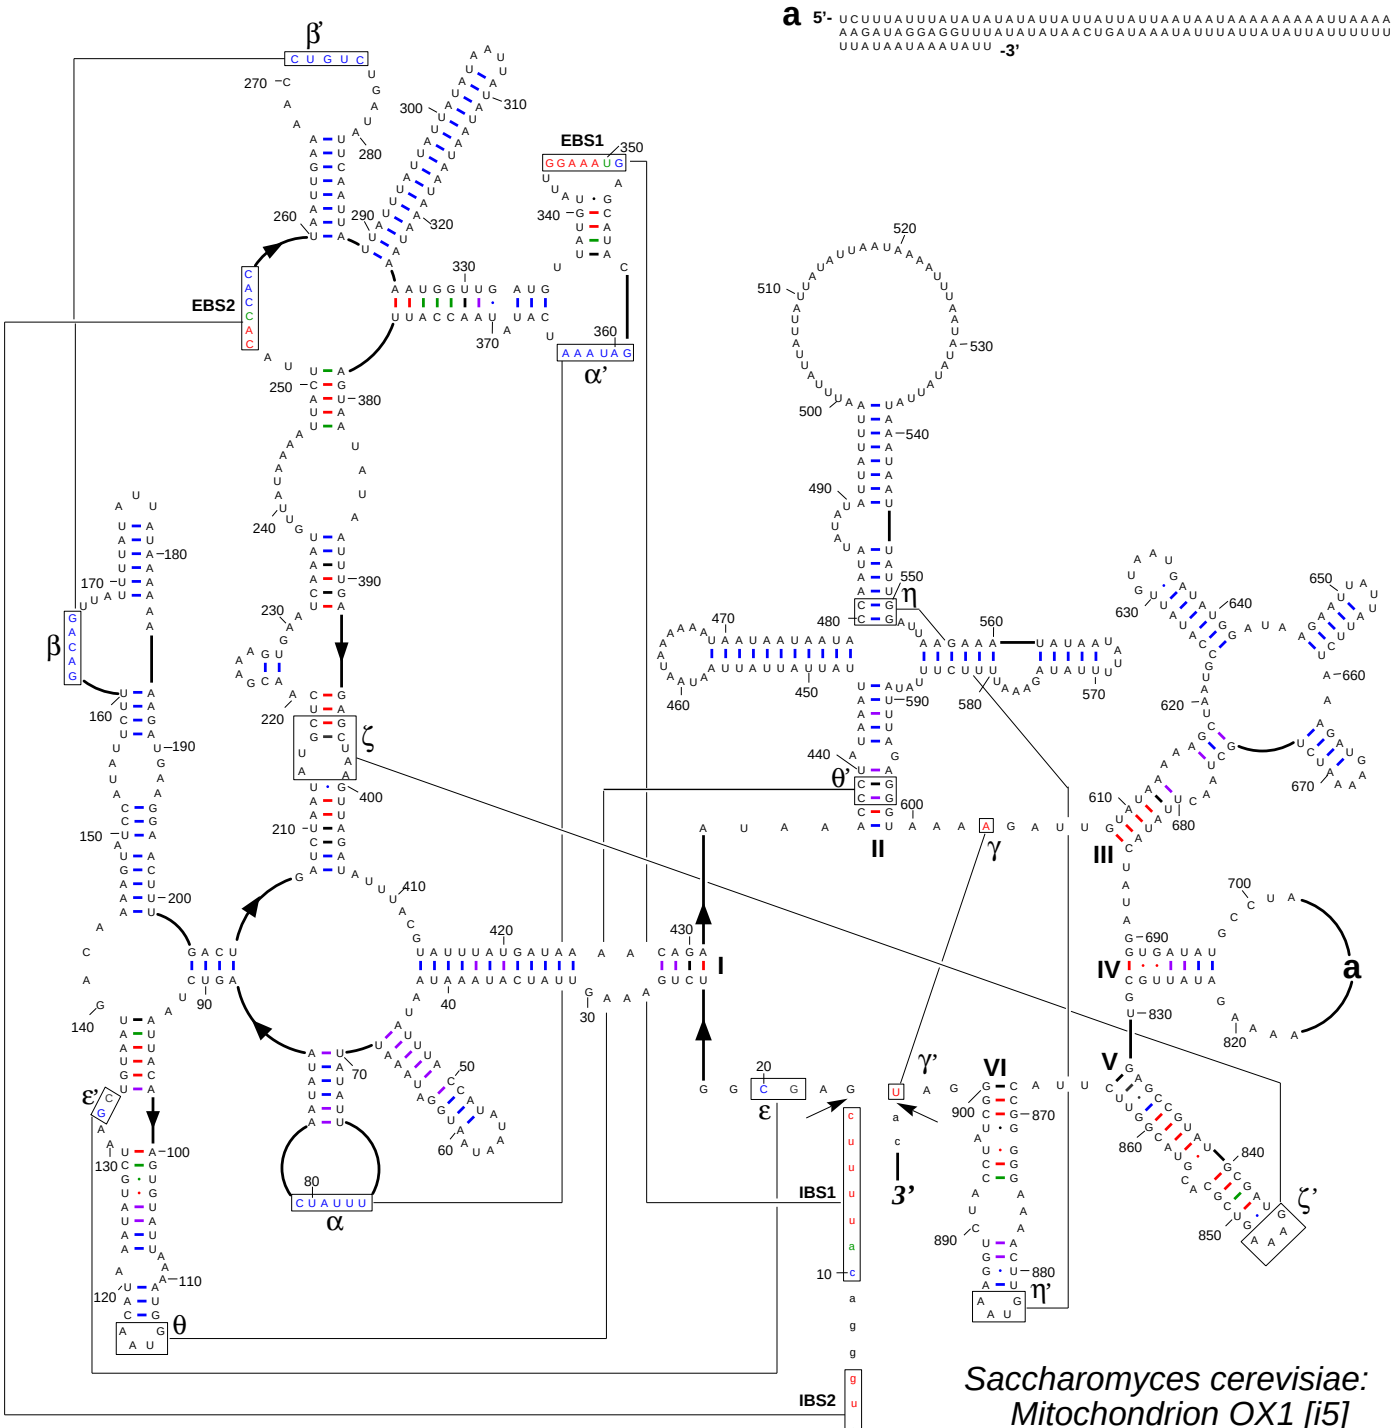
Secondary Structure: Group II intron



Saccharomyces cerevisiae: Mitochondrion OX1 [i5]

(V00694) (IIB)

1.Eukaryota 2.eukaryote crown group

3.Fungi/Metazoa group 4.Fungi 5.Ascomycota

6.Saccharomycetes 7.Saccharomycetales

8.Saccharomycetaceae 9.Saccharomyces

November 2001

Red: Strong covariation support.

Purple: Strong covariation support, but only in a subset of sequences.

Helix-Extend candidates: wcgu > 50%, antiparallel and consecutive.

Gray: Invariant base pairs.

Green: Weak covariant support.

Black: neither gray nor green.

Blue: Not Detected by our methods.
